1. Claims 1-5 are rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claim(s) are narrative in form and replete with indefinite and functional or operational language. Note, for example, lines 17-30 of claim 1. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim(s) are replete with lack of antecedent basis. Note, for example, "the shaft body" and "the rod" in claim 1. The claims are replete with grammatical and idiomatic errors. Note, for example, lines 24-30 of claim 1. Claim 5 must end in a period.

In lines 1-2 of claim 1 it is not clear as to how a screwdriver tip can comprise a screwdriver shaft and a screwdriver tip. Claim 2 is misdescriptive since the elastic pad body does not have a volume larger than the cavity hole. It appears that applicant is attempting to define the elastic pad body as having a width or diameter larger than the width or diameter of the cavity hole.

Applicant must thoroughly review and amend claims 1-5 to correct the above cited errors.
